Decentralized Energy Supply

Joint presentation for combined heat and power (CHP), combined cooling, heat and power (CCHP), and waste heat recovery (ORC)

A comprehensive overview of decentralized concepts for the future-proof, low-cost supply of energy for industry, public utilities, the commercial sector and the housing industry.

Good reasons to exhibit:

- You’ll be just a few steps away from related displays in the show categories Electromobility, Wind and Solar Energy, Energy Storage and Intelligent Networking
- Central location in Hall 27, occupied by approx. 40 exhibitors from five countries
- Daily VIP delegations
- Sponsored by German industry association B.KWK, representing the CHP sector
- National and international press coverage and PR support
- Display category “Building Energy Technologies” in the direct vicinity
- Key forum “Decentralized Energy Supply & Building Energy Technologies”, organized by big-name partners such as VDI-GBG, EnergyAgency.NRW and B.KWK
- Located adjacent to Partner Country Sweden presentation, thus ensuring more visitors and more business from Scandinavia
Your participation options
Full-service package or workstation

With one of our all-inclusive, full-service packages, you can exhibit at the world’s leading industrial technology show with a minimum investment of time and effort. The full-service package gives you ample space for exhibits that show your solution at work. The workstation option is an ideal choice for energy consultants and service providers.

Full-service package
