KIMIA FARMA SUNGWUN PHARMACOPIA

Kimia Farma is pharmaceutical state-owned enterprise in Indonesia that has been distributing its product to global market. As one of its subsidiaries, Kimia together with Sungwun Pharmacopia of South Korea established Kimia Farma Sungwun Pharmacopia (KFSP) and through the technology transfer process to develop pharmaceutical ingredients and cosmetic raw material.

High-quality medicine is also made from high-quality raw material to ensure that we follow strict regulations such as GMP (Good Manufacturing Process) from the Indonesian FDA and the Halal Insurance system. Nowadays, the non-communicable disease has become epidemiology that increases rapidly.

Thus, we have successfully developed anti-cholesterol such as Atorvastatin, Simvastatin, Clopidogrel, and many more. We also provide a wide variety of anti-retroviral such as Efavirenz, Tenovovir, Lamivudin, Entecavir, and Zidovudine.

Kimia Farma has a complete business entity and integration in running the healthcare services. From raw material factory to distribution and retail, Kimia Farma ensures the delivery of safe and high-quality medicine to global consumers.

Through continuous improvement and long live standing process, Kimia Farma Sungwun Pharmacopia is projected for human-resources development in pharmaceutical with a vision to be the most excellent and trusted API provider company in the global market.

Kimia Farma is ready to collaborate with you.
