
Key management solutions for connected manufacturing

achelos on the NRW "Automation & Digital Factory" joint stand at the Hanover Fair 2022

Paderborn, May 30, 2022 – Paderborn-based company achelos GmbH will be presenting itself for the first time at the Hanover trade fair from 30 May to 2 June 2022 on the NRW joint stand in Hall 11 | Stand: A13/B13. The company will be addressing component manufacturers and system integrators in the automation industry. They require secure key management solutions for connected manufacturing to prove the authenticity of their hardware and software with high-quality electronic certificates. A company-wide, self-operated public key infrastructure (PKI) represents the basis for securing maximum cybersecurity of intelligently connected devices, machines, and products. The consulting and software development firm will be showcasing an extensive portfolio for intelligently networked manufacturing at the trade fair and supports PKI projects in all phases.

In cooperation with partners such as KeyFactor or Utimaco, achelos offers complete key management solutions for setting up new or migrating an existing public key infrastructure in-house. The IT security experts accompany and support PKI projects holistically. This starts with system planning and continues through system provision, all the way up to secure operation.

"We are specialists in the delivery of key management solutions for connected industrial applications. Our portfolio, which is matched to this customer group, makes us an attractive conversation partner for trade fair visitors from the automation industry," comments Dr. Michael Jahnich, Director Business Development at achelos, referring to excellent conversations at the Hanover Fair.

achelos is a manufacturer-independent consulting and software development firm with headquarters in Paderborn, Germany. The IT security experts develop and operate highly specialised products, solutions and services that comply with international security standards. achelos offers manufacturers and integrators in the automation industry comprehensive support for setting up new and migrating public key infrastructures - from planning, through provision, all the way up to secure operation. Application-specific requirements and standards are taken into account here alongside existing processes and certifications. In this way, achelos creates customer-optimised, individual key management solutions. achelos is also certified to ISO 9001, ISO 27001 and Common Criteria. www.achelos.de | www.iot.achelos.com
