

The employee app for better internal communication

Empowering Every Employee

The employee app for your deskless workforce. Reach all employees – from the office to the sales floor.

Simple

For the first time, you can quickly and simply distribute information and content to your employees with your own employee app – targeted and in real-time. Using the app is intuitive and requires no training.

Secure

Your employee app offers the highest protection level for your data and fulfils all information security standards. Your data is encrypted in compliance with the GDPR and is hosted exclusively on German servers certified to ISO 27001.

Individual

Your employee app in your own corporate design not only creates trust within your workforce but also significantly strengthens identification with your company.

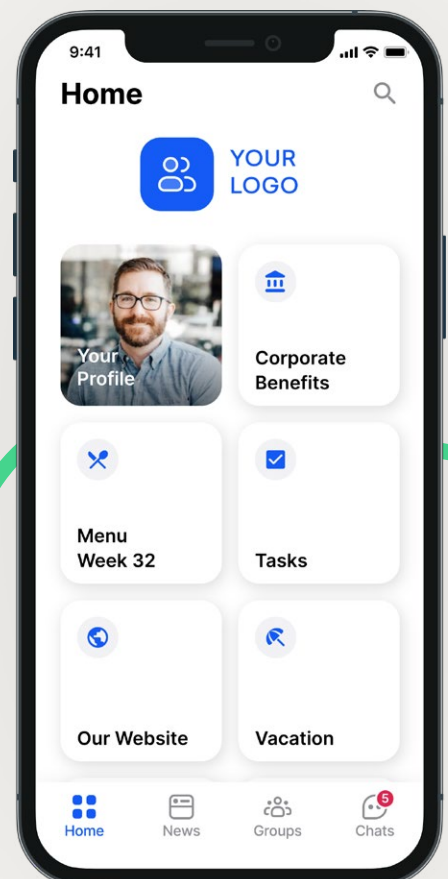

Inclusive

Your app enables you to reach and connect all employees, no matter where they are or what language they speak. This is how you strengthen the sense of belonging, create connectivity, and build a unique feedback culture.

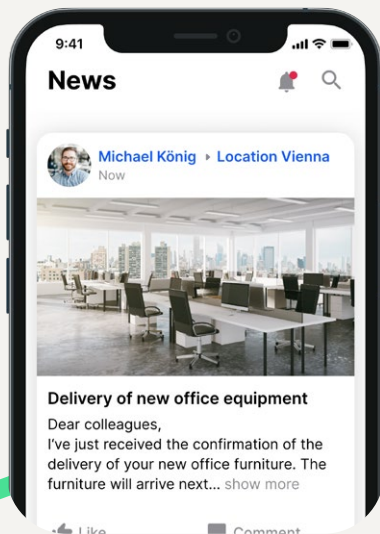

Offline-capable

Your app is the only one that can be used anywhere and at any time – with or without data reception. So even employees on the sales floor or in the warehouse stay informed.

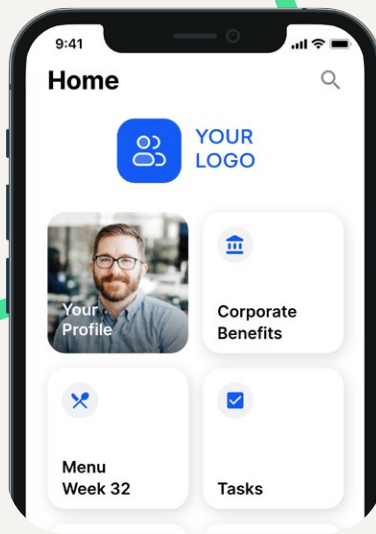

What your employee app can offer...

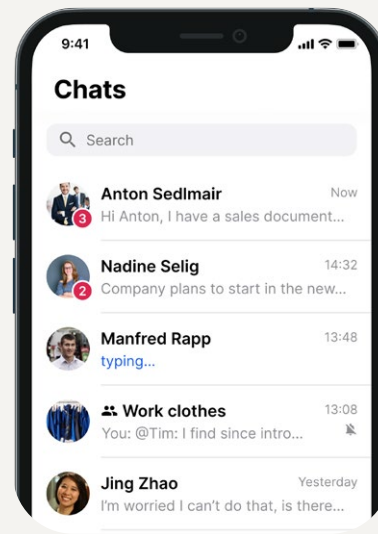

Newsfeed

Get all the latest news from the company in your own personal newsfeed.

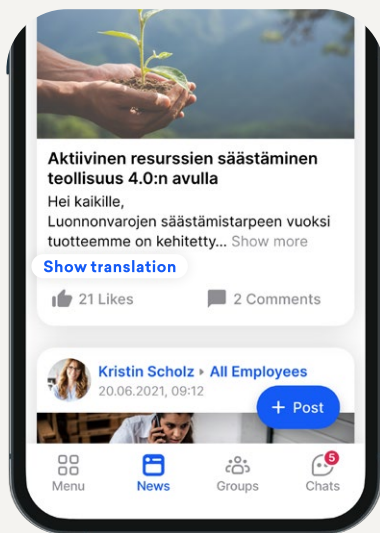

Customised Menu

Manage your personal profile and integrate additional features such as your existing HR and IT landscape right into your menu.

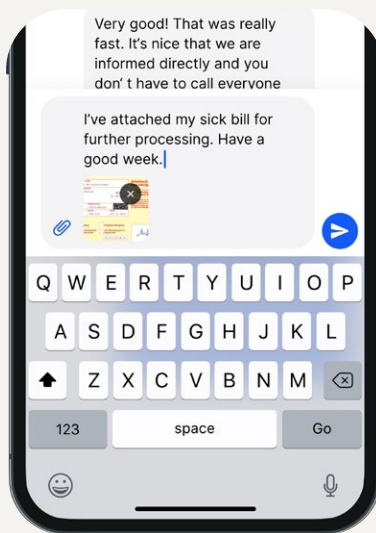

Individual & Group Chats

Communicate quickly and efficiently with all colleagues and reduce time-consuming coordination processes.

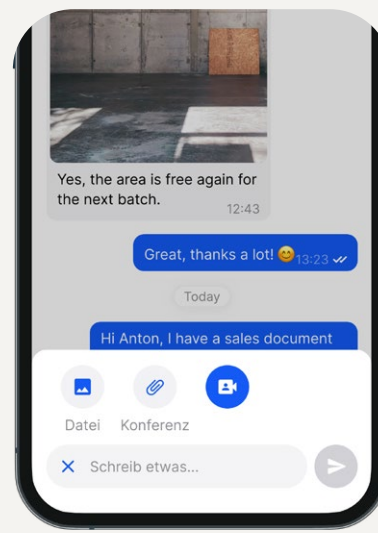

Translation

Translate posts and messages with one click and in compliance with GDPR into 26 different languages (new ones added continuously).

Send Files

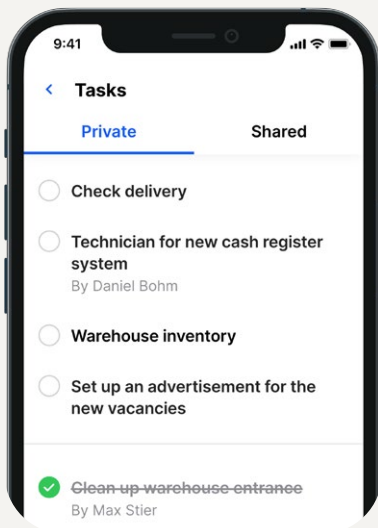

Securely share photos, videos and other documents (all file formats) in chats and groups with just two clicks.

Video Conferencing

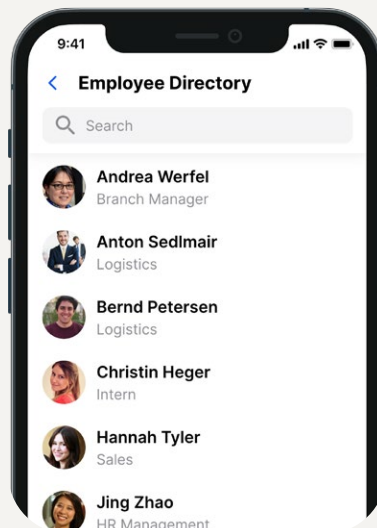

Using the in-app video conference feature, you can easily set up a meeting with all employees or share links with external attendees.

... and even more

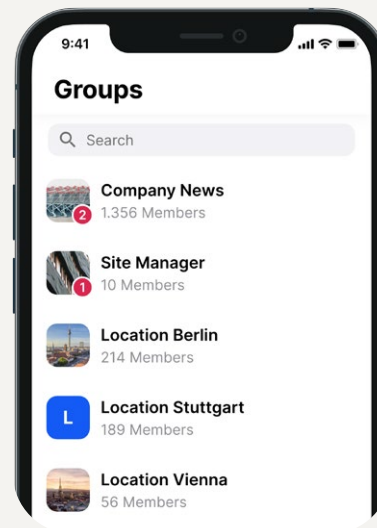

Task Management

Set tasks for yourself or colleagues including due dates, pictures or files. Completed tasks can be successfully checked off.

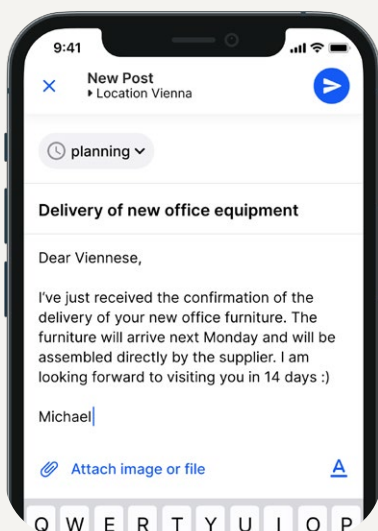

Employee Directory

Finding colleagues and their responsibilities company wide made easy with structured and transparent communication channels.

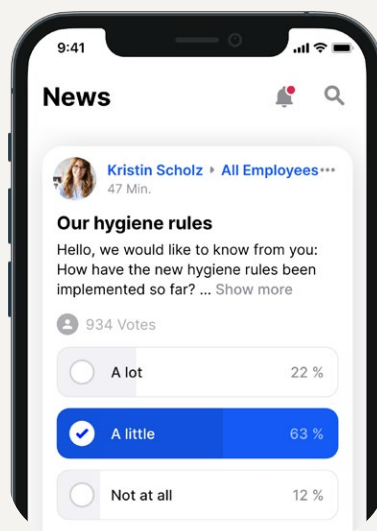

User Groups

Streamline internal communication by sharing and receiving information in groups that are specifically relevant to you.

Schedule & Export Posts

Write your posts in advance and publish them automatically on a set date. You can also export posts to external systems.

Surveys

Promote an open feedback culture by capturing the opinions and moods of the whole organization quickly and easily.

We care about the success of your employee app

That's why we support our customers not only before and during the rollout, but also way after the go-live of the app. We are always by your side with extensive expertise as your reliable partner. Below you will find an excerpt of our services for a successful rollout of your employee app.
