A World Without Plastic Pollution

OUR JOURNEY

The Journey of Evoware

It's all started when our Founder, David Christian, got back to Jakarta from his study in Canada in 2014.

He saw that the plastic pollution was terrible. Then, he tried to seek for a unique alternative materials and also raise awareness about using renewable resource to replace single use plastic items.

OUR JOURNEY

With a groundbreaking innovation to use seaweed as material to create edible cups and packaging. Evoware established in 2016,

By 2017, our Seaweed-based Packaging products were featured in global news; winning numerous awards and gaining international recognition as a viable alternative to plastic.

In 2019, Evoware is determined to expand the business by offering a wider range of solutions from other alternative materials.

ABOUT US

Evoware

A World Without Plastic Pollution

Evoware is a sustainable packaging company that aims to create a world without plastic pollution. We are building global supply chain network for wide range of plastic-free and compostable products along with initiating collaborative plastic awareness movement called Rethink Campaign.

Our Core Values

Innovation

Where we rethink about the way we live today, and create innovations that could be the solutions to the current plastic problem.

Sustainability

Where we ensure that our products are made of natural materials, processed sustainably, and decomposed naturally.

Collaboration

Where we involve our partners, customers, governments, and other stakeholders, to work together in promoting sustainable lifestyle.

Our Product Categories

OUR PRODUCT CATEGORIES

Home-compostable

Home compostable is a term used for products made of materials that fully decompose through biological processes in conditions you can easily create at home.

Industrial-compostable

Industrial compostable products must be composted in industrial composting environment because they require a certain condition to degrade.

Reusable

Reusable product means a product that can be used several times for an intended end use before being discarded, such as a washable food or beverage container.

THE MISSION

Our Mission

Creating global supply chain
for sustainable product

GLOBAL DISTRIBUTION

We have distributed our products to more than 50 countries.

THE SOLUTION

Innovative Solutions

We aim to promote sustainable consumption

by giving ecolution (eco-solution) to bridge the needs between producers and consumers in distributing products sustainably. Evoware provides a wide range of alternative materials, from biodegradable and compostable.

Packaging**

OUR CLIENTS

We're glad to be a part of the sustainable journey of our partners

We know very well that switching to sustainable practices is not easy and takes a lot of effort, so we thank them and want to celebrate every little step.

Here are partners that have chosen our bio-packaging to provide a better alternative for their customers.

OUR CAMPAIGN

rethink. campaign

We have the opportunity and responsibility to make sure that we keep plastic within a circular economy and out of the environment. Therefore, we initiate collaboration between multiple parties to create an ecosystem for plastic waste reduction.
