SINCE 2002

GROUP OVERVIEW

THE FIRST PLATFORM FOR NEW TECHNOLOGY AND INDUSTRIAL APPLICATION

MAKE FRONTIER TECHNOLOGY MORE ACCESSIBLE

EMDOOR GROUP

Emdoor was founded in 2002, it is the world's leading high-tech enterprise in technology sales, application and industrialization. And an innovative company focusing on mobile terminals, industrial application terminals and IOT solutions.

COMPANY STRUCTURE

Emdoor Information

Rugged &
Industrial Terminals

Emdoor Digital

Laptops/Tablet/AIOT
Commercial Display

Emdoor Electronic

Distributor of R&D tools
Established in 2002

Emdoor VR

VR/AR/AI

STAFF COMPOSITION

Now total is more than 1300, 50% is R&D, with staff located in Shenzhen, Beijing, Shanghai and Taiwan.

GROUP ADVANTAGE

21 YEARS

OPERATING CAPACITY

Enterprise diversification, Delivery capacity for big order

MULTIPLE PLATFORMS

Intel, MTK, Qualcomm, RK, Phytium, Microsoft, Google, Kylin

TOP LEVEL IDH

R&D strength & personnel, Enterprise projects diversification, Big order & bid

EXTENSIVE PRODUCT LINE

Rugged & Industrial products, Laptops, Tablets, AI speaker, VR/AR, Software service and so on

COMPANY OVERVIEW

LEADING GLOBAL PROVIDER OF RUGGED COMPUTERS

MORE STABLE AND MORE EFFICIENT

DEVELOPMENT HISTORY

2008, Emdoor Information was born in Shenzhen.

2012, Emdoor Information started focusing on **industry customized** computer business.

2014, Emdoor Information officially entered the field of **rugged tablets**.

2015, Emdoor Information successfully launched the **1st Intel Windows** 10.1-inch rugged tablet.

2016, Emdoor won the Microsoft Best ODM Partner Award, and became Google's official ODM partner.

2017, Emdoor Information successfully launched the 1st Intel Windows 6-inch rugged handheld and a 12.2-inch 2-in-1 rugged tablet/notebook.

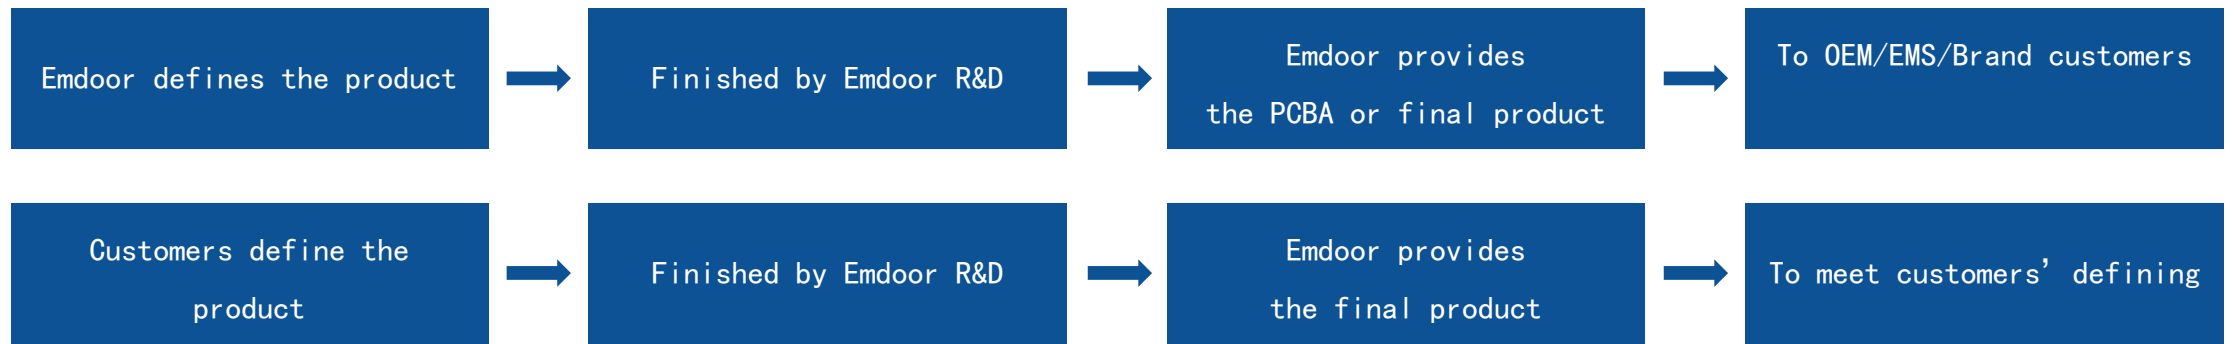

2019, Emdoor Information achieved **full coverage** of rugged products from 4-inch to 15.6-inch sizes.

2021, Emdoor Information successfully launched a series of rugged products of high performance based on **Qualcomm Snapdragon and Intel i5/i7** platform.

In 2022, Emdoor Information **Pingshan Production Base** officially opened, with the area and capacity expanded by about twice, providing high-quality, lean and sustainable production.

BUSINESS MODEL

We provide the most competitive rugged products and solutions, below are two business models.

COMPANY **ADVANTAGE**

YEARS OF TECHNOLOGY ACCUMULATION

15 years of industry exploring, 11 years of industry developing

HIGH QUALITY SUPPLIER CHAIN

Long-term and stable strategic cooperative relations with original manufacturers

A FULL RANGE OF PRODUCTS

Full coverage of multiple shapes, multiple sizes and multiple platforms

STABILITY AND RELIABILITY INSURANCE

1000 square meters of laboratory, hundreds of laboratory apparatus

PROFESSIONAL PRODUCTION LINE

5000 square meters of manufacturing workshop, with an annual capacity of more than 400K

CUSTOMAZATION CAPABILITY

Customazation design, development, production and support from the excellent customazation team

CUSTOMIZED SERVICES

Acer's Enduro Series Rugged PC

Branded Customization for Customer Brand

Mainly rugged notebooks and tablets, for harsh and challenging environments.

India Education Machine

Software Customization for Software Functions

Equipped with customized software to provide end-to-end solutions for the paperless test.

OZNER Water Purification System

Structure Customization for Special Appearance

Provide features like wireless connection, remote control, information display, etc.

Israel Remote Medical Device

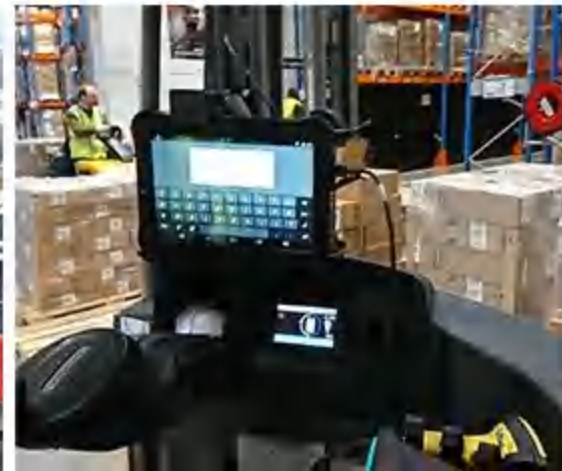

Hardware Customization for Interfaces and Modules

Specialized for various interfaces, stable communication module and positioning function.

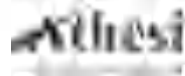

SUCCESSFUL CASES

Emdoor rugged computers have been applied in a wide range of industrial fields.

Enterprise planning

Construction of Shenzhen Pingshan Headquarters

Pingshan District further complements the innovation chain around the industrial chain, continues to build and introduce a number of science and technology industry innovation platforms closely supporting the leading industries, and accelerates the construction of a technology innovation system with deep integration of industry, university, research and application. The headquarters of Emdoor will be built here, and innovative talents and new technology development will be deeply distributed in Pingshan, where the groundbreaking ceremony has been completed in 2020 and the “topping-out” ceremony has also been completed earlier this year. In 2023, Emdoor Building Industrial Park will be relocated, to provide our partners with better service and support!

Expectation

Integrity builds dreams,
Innovation leads the future!

From product to scene, from industry to world, from exploration to innovation. Yesterday's continuous surpassing has made Emdoor as it is today, and today's Emdoor will be ready for a higher stage of development.

Adhere to the mission of "Make frontier technology more accessible", and use innovative technology to change human life.
