

AI-Powered Visual Inspection for Modern Manufacturing

Enabling scalable, consistent quality control across serial production

Company Overview

24VISION PROVEN IN REAL PRODUCTION AT SCALE

USED BY LEADING MANUFACTURERS

- ✓ Trusted in serial production at major industrial companies

IN OPERATION TODAY

- ✓ Deployed in high-volume production with consistent defect detection

BUILT TO SCALE

- ✓ From single stations to multi-line and multi-plant deployments

A SPECIALISED PARTNER FOR AI-DRIVEN VISUAL INSPECTION

FOCUSED ON CRITICAL QUALITY CHALLENGES

- ✓ Ensures consistent detection of defects across complex products

BUILT BY A SPECIALISED TEAM

- ✓ Combines AI, computer vision, and industrial engineering expertise

DESIGNED FOR REAL-WORLD CONDITIONS

- ✓ Delivers consistent results in real production environments

Founded in 2019, 24 VISION is a specialised team of AI and industrial experts focused on visual inspection

CONSISTENCY

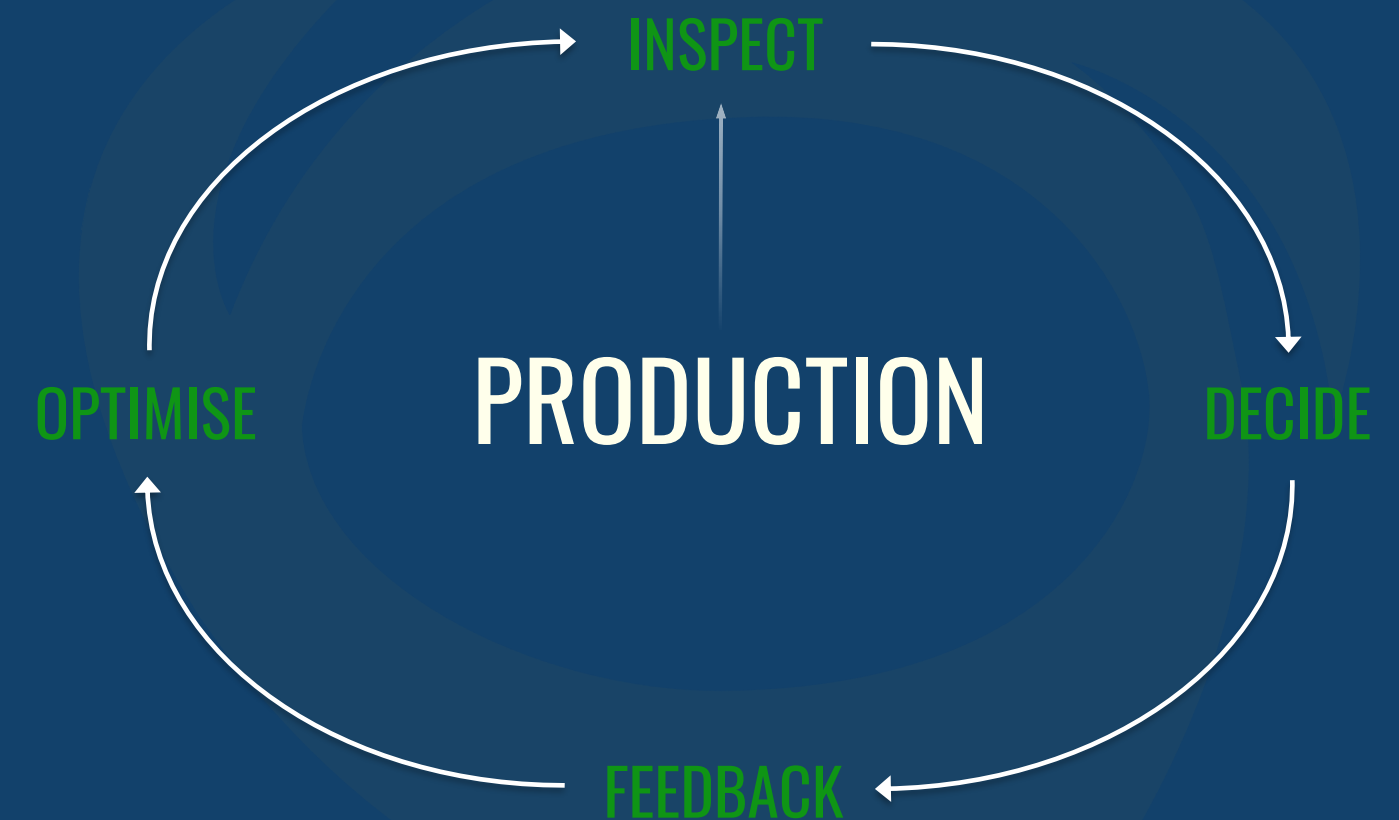

- ✓ Reliable inspection across shifts, lines, and locations

EFFICIENCY

- ✓ Less rework, fewer disruptions, faster ramp-up

GOVERNANCE

- ✓ Centralised control and traceability across quality processes

AI-driven visual inspection is key to competitive production performance
